Career Objective: With 6.8+ years of diverse IT experience, I bring a strong blend of technical skills and business acumen that make me a valuable asset to any organization. My ability to communicate clearly, pay attention to detail, and build strong interpersonal relationships has been instrumental in my success as a Business Analyst. I specialize in stakeholder management, team coordination, requirements elicitation and prioritization, problem-solving, and negotiation. I am adept at collaborating with various stakeholders to ensure alignment and drive project success.

Core Competencies: Leadership, Communication, Time management, Risk management, Stakeholder management, Budget management, Problem solving, Decision making, Team management, Quality management, Adaptability & flexibility, Negotiations, Agile Scrum, Product Backlog Management, User Story Mapping, Roadmap Planning, Cross-Functional Collaboration, Stakeholder Management, Market Research & Competitive Analysis, Sprint Planning & Execution, Requirements Gathering & Documentation, Product Lifecycle Management, User-Centric Design, Data-Driven Decision Making, Figma, Jira

Professional Work Experience

Cybage Software (Pune)

Business Analyst 07/2022 - Present

- Act as a bridge between Business, Engineering, and Users to champion best practices and help the development team in improving the delivery methods to create high-value products.
- Lead core execution teams, providing clear direction and effective delegation
- Mentor and support junior team members, facilitating their development and addressing any concerns
- Serve as a vital link between the execution layer and the management layer, ensuring seamless communication and alignment
- Conduct client workshops to gather requirements by understanding & assessing user needs, objectives & pain points.
- Manage product backlog and help in prioritizing product release features while creating the roadmap for the releases.
- Translate business requirements into clear functional/technical specifications including use cases, user stories, workflows, design documents, and similar documents; document feature requirements as user stories and obtain client sign-off.
- Highlight/identify gaps in existing functionality/user requirements.
- Support and contribute to user acceptance testing (UAT) efforts, including test case development, test execution, issue resolution, and assist in triaging functional defects.
- Liaise with different stakeholders including the client/business owner, project manager, solution architect, developers, testers and validators to ensure timely delivery of items.
- Understand the business justification for the product, client's vision, and future scope.
- Act as a liaison between IT, Quality, and business teams to ensure effective communication and alignment on system changes.
- Document all project-related information such as Functional Specification documents, Validation documents, and other functional documentations as per the appropriate format.

- Participate in Agile development processes and contribute to sprint planning, daily stand-ups, and retrospectives.
- Work closely with the Design team to translate user requirements and business goals into intuitive, user-friendly designs.
- Develop change rationale and perform scoping assessments to determine the feasibility of potential changes.
- Collaborate extensively across the organization, keep abreast of industry trends, continuously learn and adapt to new tools and techniques, and contribute to process improvement efforts.
- Ensure the project milestones are achieved on time.
- Drive calls with the client and other business stakeholders to gather product requirements.
- Lead the daily scrum calls to ensure smooth progress of the project.
- Translation of requirements into technical specifications.
- Familiarity with project management methodologies and tools.
- Expertise in Agile (incl. PI Planning, Roadmap Development, Backlog Prioritization etc.).
- Product Mindset & Analytical Skillset.
- Experience in conducting & analyzing user research.
- Excellent communication and interpersonal skills, with the ability to effectively interact with stakeholders at all levels.
- Self-motivated, with the ability to work independently and handle multiple tasks effectively.
- Strong relationship building and team collaboration skills.

Key Achievements:

- Successfully launched feature that resulted in an increase in user engagement.
- Increased customer satisfaction through prioritizing high-impact features based on customer feedback
- Optimized product development cycle, reducing backlog items.

Benchmark IT Solutions (Pune)
